

Informal science learning in NTSEC: The learning outcomes & experience of weekday courses

Shan-Yu Liu, *National Taiwan Science Education Center, Taiwan*

Science museums used to be one of the important places for informal learning. People will enjoy the learning process in exhibitions and activities. There are 13 laboratories in NTSEC that we develop and implement science courses for students. Students can learn science multiple pathways like exhibition and experiments. We collect 1600 students' questionnaires about learning understanding and motivation for 9 topics of science courses to know their learning outcomes and experience in informal learning.
