

Creating New Science Exhibitions - Working with Fabricators and Designers

Facilitator: **Mr Chee-kuen (CK) YIP**, *Stemagineer, Former President & Executive Director of ASPAC, Hong Kong*

This workshop targets those that are new to the planning of science centre exhibitions. With the growing demand of more STEM exhibitions and activities worldwide, many are joining science centres with background from other areas. Science centre exhibitions have unique characteristics that are not common to trade and non-science museum exhibitions. The workshop will cover, with hands-on exercises, areas that can easily be overlooked, different types of contract with fabricators and designers, project time frame, preparation of contracts, important parts in the contracts, what should and should not be expected, cost control and potential area of failures.
